Personal Information

Name: Jóhann Hallgrímsson

National ID: 250372-3889

Mobile: 611-4748

Address: Kuggavogur 3

Postal Code: 104 Reykjavík

Email: joh@mi.is

Education

2009 – Reykjavík University, B.Sc. in Computer Science

2007 – Reykjavík University, Systems Engineering

2003 – The New Computer and Business School, diplomas in MCP (Microsoft Certified Professional), MCSA (Microsoft Certified System Administrator), MCSE (Microsoft Certified Systems Engineer)

2001 – Breiðholt College, Student Diploma

Summary

Senior full-stack software developer with more than 15 years of experience developing scalable .NET solutions. Specialized in backend development, REST API design, databases, and web solutions. Strong interest in artificial intelligence, automation, and smart software solutions.

Technical Skills

C#, .NET Core, ASP.NET, REST APIs, Entity Framework, MS SQL Server, PostgreSQL, JavaScript, TypeScript, HTML, CSS, Angular, React, Microsoft Graph API, Google Cloud APIs, Azure AD, Agile/Scrum

Work Experience

2025 – 2026 CEO – Huxun

Main responsibilities:

- Development of systems and supporting services related to questionnaire software for companies to measure employee satisfaction.

- Temporary project.
- Software development using an Agile frontend and .NET Core backend with PostgreSQL and Entity Framework.

2017 – 2025 One Systems Ísland ehf

Main responsibilities:

- Development of a CRM system and related services used by most municipalities in Iceland as well as various institutions and companies.
- Web authentication using Auðkenni and island.is.
- PDF document signing using Auðkenni.
- Sending notifications and documents using the island.is digital mailbox.
- Microsoft Graph API integrations retrieving data from Teams, Outlook, SharePoint, and other Microsoft services.
- Google Translate API integrations.
- Document processing and conversion using the Aspose framework.
- Integration with Nav/Ax systems through web services.
- Preparing archival delivery packages for the National Archives of Iceland.
- Online payment solutions for handling web payments.
- Additional general and custom development projects.

2015 – 2017 LS Retail

Main responsibilities:

- Development of POS (Point of Sale) systems including LSFirst (WinForms, C#) and the newer MPOS (Metro app using HTML and TypeScript).
- Backend development in Microsoft Dynamics AX and operation of these systems.
- Worked on the largest POS implementation in the world in cooperation with Microsoft for AAFES (U.S. Armed Forces Exchange Service).
- Development of MPOS solutions for Jet gas stations in Europe and Cracker Barrel restaurants in the United States.
- Additional project: insurance system written in X++ in AX Dynamics with an MVC.NET website using Icelandic eID authentication, retrieving data from AX and storing it using RTS services.

2014 – 2015 Five Degrees ehf

Main responsibilities:

- Development of a banking backend client in WinForms and web-based client versions.
- Worked in an MVC .NET environment mainly focusing on frontend web interfaces including middleware and database work.

2011 – 2014 Iceland Post

Main responsibilities:

- Development of internal tools using .NET, C#, WinForms, WebForms, JavaScript, jQuery, web services, Java JSP, and MS SQL databases.
- Assisted with development of the main Iceland Post website using CXXL or Umbraco CMS.
- Administration of purchased and open-source systems such as actiTIME and OpenText Content Server, as well as IIS, Windows, and Linux servers.
- Designed a database containing all postal addresses in Iceland and web tools for managing entries.
- Tools for route management for mail carriers.
- Tools for registering postal shipments into SAP where SAP lacked direct functionality.
- Quality manual system using web services connected to Livelink servers.
- Designed a system to scan invoices and import them into SAP.
- Mail scanning system for the Epost service that scanned barcodes printed by sorting machines, compressed documents, and transferred them securely via FTP.
- Tool for processing invoices and payment slips from Epost and preparing them with barcodes or OMR markers for envelope packing machines.

2009 – 2011 Leto ehf

Main responsibilities:

- Development of a social networking website with approximately 20 million users using .NET, C#, and ASPX.
- Built administrative tools and supporting utilities in .NET including web apps, console programs, and WinForms tools.
- Developed Mono-based Linux software sending 4–10 million emails per day.
- Wrote SQL scripts for MS SQL Server 2008 and managed Microsoft web servers and Linux mail servers.

- Developed a multi-threaded WinForms email tool communicating with Linux services and dynamically balancing email traffic across multiple SMTP servers and IP addresses to avoid spam detection limits.

2004 – 2006 Miðnet

Main responsibilities:

- Computer repair and technical support.
- System administration and user support.
- On-call technical support mornings, regular work primarily afternoons (approximately 50–70% position).
- The company was sold in November 2006, after which I began full-time studies at Reykjavík University.

Interests

I enjoy playing guitar and occasionally other musical instruments. I also enjoy traveling, hiking with our dog, and many of my hobbies involve computers in one way or another.

Respectfully,
Jóhann Hallgrímsson
